DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1- 32, and 36-56 drawn to a generating database, classified in class 707, subclass 102.
- II. Claims 33-35 drawn to database processing system, classified in class 707, subclass 104.1.

Inventions I, and II are related as combination and subcombination respectively.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particular subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination (I) as claimed generating database system does not require the method of launching a web browser process as claimed in subcombination (II). Subcombination (II) the method of launching, indexing and deleting data files as claimed has separate utility by itself or in other combination does not require the particular combination as claimed in combination (I) of generating a database for patentability. Therefore, the inventions are distinct; however, they could be usable together.

Art Unit: 2171

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for I is not required for II, respectively, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Steven J. Henry April 15, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
